Residential Prints

Skill Trades 1201

Outline

- Introduction
- Elevation view
- Plan view
- Sectional view
- Detail view
- Plumbing plan
- Electrical plan

 Blue prints are a set of technical or working drawings (multi-view).

 They provide trades people the necessary information needed to construct a building.

Introduction

 A complete set of prints contain most of the information needed to construct a building.

 The information is presented using different types of drawings, charts and views.

Elevation View

Elevation views show what the completed house will look like if you were standing in front, to the side, or to the back of the building.

- Elevation views contain information such as:
 - The type of exterior siding
 - Roofing materials and slope
 - Windows and doors
 - Location of decks
 - Patio and steps

Elevation View

Plan View

 Plan views or floor plans are used to show the interior layout of the building.

- Plan views show the location of the:
 - Rooms
 - Doors and windows
 - Interior walls
 - Closets
 - Stairwell
 - Electrical and plumbing systems

Plan View

Sectional View

 Sectional views are a type of drawing used to illustrate structural details that are not easily show on other views.

- Sectional views show the:
 - Dimensions of the exterior wall
 - Materials used in its construction such as:
 - Insulation
 - Sheathing
 - Siding
 - Foundation

Sectional View

Detail View

 Detail views are used to show the construction details of a small component of the building.

Detail View

 Electrical plans will show locations of light fixtures, fans, outlets, light switches, etc.
